

# GRIDWISE® ALLIANCE

*Advocating for a Smarter Grid*

## ***Smart Watt?***

National Association of Regulatory  
Utility Commissioners  
November 14, 2010

# How should we think about smart grid?

- Holistically rather than separate technologies
- Means to an end—enables other benefits
- Having value to all participants on grid from power plant to consumer

About the  
Alliance

# Where are the gaps?

- Data
- Policy
- Interoperability standards
- True cross-stakeholder collaboration

## Smart Grid Gaps

# How can industry help?

- Identify and communicate benefits across system with real data
- Develop principles by which to measure policy
- Work collaboratively with consumer groups, other stakeholders

**Industry's  
Role**
