

Converged Networks—POTS and PANS and a Recipe for Success

NARUC Winter Conference 2009

your friend in the digital age®

Cable

High Speed Internet

Telephone

Wireless

- ❑ Same basic service on separate technologies: TDM, PS, SIP, CDMA, LTE/WiMax.

- ❑ Complex Connections/Inefficient Interfaces

- SIP Core (Cox Switches/Vendors/Others)

- SIP Access

- Separate the service from any specific layer and transport.
 - **Open APIs internally, 3rd party**
 - **Less dependence on single vendor**
 - **Faster to market**

- Speed to Market and agility to meet consumers' communications demands
 - Today
 - Future
- Network stability
- Future proof
- Reduce OpEx and CapEx
- Reduce network complexity
- PANS

□ Wholesale

- **Interconnection**

□ Retail

- **Customer Impact**
- **Regulation only where needed**
- **Uniform across country**

□ Technology Neutral

- **Focused**
- **Responsive**
